OBJECTIVE

System Administrator with 3+ years of enterprise IT experience across Microsoft 365, Exchange Online, Entra ID, Active Directory, Intune, Microsoft Defender, Windows/Linux infrastructure, VMware, backup operations, and PowerShell. Hands-on experience with AWS IAM, EC2, VPC, S3, CloudWatch, CloudTrail, Secrets Manager, and cloud security labs. Seeking opportunities in Microsoft 365 Administration, Identity & Access, Cloud Administration, AWS, or Cloud Security.

EDUCATION

Bachelor of Computer Applications (Cyber Security), Amity University 2024 – Present

Diploma in Cloud Computing, Jetking Infotrain, Delhi 2023 – 2024

CORE SKILLS

Microsoft 365	Microsoft 365 Administration, Exchange Online, Mailboxes, Shared Mailboxes, Distribution Groups, Mail Flow, Permissions, Outlook, Microsoft 365 Troubleshooting
Identity & Access	Microsoft Entra ID, Active Directory, MFA, Conditional Access, RBAC, User & Group Management, GPO, Authentication, Access Control, SSO
Microsoft Security	Microsoft Defender, Defender for Endpoint, Email Security, Phishing Protection, Quarantine, Endpoint Security, Security Monitoring
Cloud & AWS	AWS EC2, IAM, IAM Roles, Instance Profiles, S3, VPC, Security Groups, CloudWatch, CloudTrail, Secrets Manager, KMS, MFA
Endpoint Management	Microsoft Intune, Device Enrollment, Configuration Policies, Compliance Policies, Application Deployment, ManageEngine
Infrastructure	Windows Server 2019/2022, Linux/Ubuntu, VMware ESXi, vCenter, DNS, DHCP, VPN, RDP, TCP/IP, LAN/WAN
Backup & Recovery	Veeam Backup & Replication, Commvault, Backup Monitoring, Troubleshooting, Restore Validation
Automation & Tools	PowerShell, ServiceNow, Remote Support, Incident Management, Hardware Troubleshooting

EXPERIENCE

System Administrator Jul 2025 – Present
Comnet Innovations Pvt. Ltd. Gurugram, India

- Manage and support 200+ Windows and Linux servers in VMware ESXi/vCenter environments.
- Administer Active Directory users, groups, GPOs, access control, authentication, and replication health.
- Manage Microsoft 365 and Exchange Online, including mailboxes, shared mailboxes, distribution groups, permissions, and mail flow.
- Support Microsoft Entra ID, MFA, Conditional Access, and Intune-related access and device-management issues.
- Support Microsoft Defender, Trend Micro, and CrowdStrike for endpoint and email security operations, including phishing, quarantine, and suspicious activity investigations.
- Monitor Veeam and Commvault backup jobs, troubleshoot failures, and perform restore validation.
- Use PowerShell for administration, troubleshooting, reporting, and routine operational tasks.
- Manage incidents and service requests through ServiceNow while following SLA, access-control, and security procedures.

- Provided L2 technical support for 3,000+ enterprise users across Windows environments.
- Installed, configured, and troubleshoot Windows systems, applications, peripherals, VPN, BitLocker, and common desktop issues.
- Resolved Active Directory password resets, account lockouts, authentication, and group-access issues.
- Supported Microsoft 365 and Outlook issues involving mailbox access, authentication, profiles, and connectivity.
- Assisted users with MFA enrollment, authentication troubleshooting, endpoint-security, and remote-access issues.
- Managed incidents and service requests through ServiceNow according to SLA requirements.

SELECTED PROJECTS

AWS Secure EC2 & IAM: Built a hands-on AWS environment using EC2, IAM roles and instance profiles, VPC, Secrets Manager, KMS, CloudTrail, and CloudWatch. Practiced least-privilege access and secure credential management.

AWS VPC & Network Security: Designed a hands-on VPC environment with public/private subnets, route tables, Internet Gateway, NAT, security groups, and NACLs. Practiced EC2 connectivity and network troubleshooting.

Microsoft Entra ID & IAM: Practiced Entra ID identity administration including users, groups, MFA, RBAC, SSO, Conditional Access, sign-in troubleshooting, and least-privilege access.

Microsoft 365 Administration: Practiced Exchange Online administration including mailboxes, shared mailboxes, distribution groups, permissions, mail flow, and Microsoft 365 troubleshooting.

Microsoft Defender & Endpoint Security: Practiced endpoint security scenarios involving Microsoft Defender, phishing investigation, quarantine, suspicious activity investigation, and security monitoring.

Microsoft Intune Device Management: Practiced device enrollment, configuration policies, compliance policies, application deployment, and endpoint-management troubleshooting.

Active Directory Administration: Built a Windows Server AD environment and practiced users, groups, OUs, GPOs, DNS/DHCP dependencies, authentication, access control, and identity troubleshooting.

Linux Server Administration: Practiced Ubuntu/Linux administration including users and groups, permissions, SSH, systemd services, networking, logs, and server troubleshooting.

CERTIFICATION & PROFESSIONAL DEVELOPMENT

- **Microsoft SC-300 – Identity and Access Administrator** – Currently Preparing
- **AWS Solutions Architect – Associate** – Planned Learning Path
